### VETERAN BURIAL LOCATION DATA, 1986

53 fiche cards

**DESCRIPTION:** This series is the output of a computer database record of deceased veterans and their burial locations. Each entry on the first sixteen fiche provides name; birthdate and place; death date and place; rank, serial number, unit, and branch while in service; enlistment date and place; discharge date and place; and county, city, cemetery, and plot location of burial. There are also fiche cards for a geographic index (see FINDING AIDS).

The series was created as part of the graves registration responsibilities of the Military Records Section of the Archives. The program helped veterans' families obtain grave markers and veterans' organizations place flags on graves on Memorial Day. Prior to moving to a computerized database, the data was maintained on cards with published booklets issued for some counties.

**ARRANGEMENT:** The name fiche is arranged alphabetically by surname. The index fiche is arranged by county of burial, thereunder by city, then cemetery name, and finally individual name.

**RELATED RECORDS:** VETERANS WITH FEDERAL SERVICE BURIED IN UTAH, series 1560, is a series of publications which provides similar information by county for veterans who died by 1965. For material never added to the database before the material was fiched and deleted, consult VETERANS' BURIAL LOCATIONS UPDATES, series 5339.

**PROCESSING NOTE:** Archivaly processed in 1990 by A.C. Cone.
